Mohamed Gamal

Full Stack Developer — Laravel · React.js · Next.js

rozny@yahoo.com +20 115 379 1575 Cairo, Egypt github.com/JimyRozany linkedin.com/in/rozny

ABOUT

Full Stack Developer with 2+ years of hands-on experience building production-grade systems using Laravel, React.js, and Next.js. Delivered features across e-commerce, ERP, medical, and project-management platforms — from database design and RESTful APIs to dynamic dashboards and payment integrations. Comfortable diving into large existing codebases, shipping fast, and collaborating in agile teams.

EXPERIENCE

Full Stack Developer

Tamakan

April 2025 – Present | Cairo, Egypt

Desar — E-commerce Platform (React.js, Redux)

- Built admin dashboard for managing 200+ products, coupons, advertisements, and banners.
- Implemented coupon engine supporting fixed/percentage discounts and product-specific rules.
- Integrated payment gateway APIs, reducing checkout friction and enabling secure transactions.
- Managed global state with Redux; improved component reusability across the dashboard.

Genaptx — Medical & Genetic Analysis Platform (React.js)

- Designed UI to surface complex genetic analysis results from backend APIs in a clear, readable layout.
- Worked with structured API data covering genetic diseases and mutation reports.
- Collaborated closely with the backend team integrating AI-based analysis features.

Follow Up — Project Management System (Laravel, Blade)

- Rebuilt the entire frontend from scratch, replacing legacy UI with a modern, role-aware interface.
- Refactored backend: updated models, migrations, and implemented a full role & permission system.
- Delivered modules for project creation, client/employee management, task assignment, stage tracking, calendar integration, and sticky-note follow-ups.

ERP System (Laravel, Laravel Modules, Blade)

- Extended ERP with sales & purchase modules, invoices, returns, and improved POS logic.
- Updated inventory and stock-management workflows to match new business requirements.
- Resolved multilingual/translation issues and maintained Laravel Modules architecture.

Game Unity — Online Gaming Platform (React.js)

- Collaborated to build a multi-page gaming website integrated with a Laravel backend API.
- Fixed existing UI and logic bugs, improving overall platform stability.

Front End Developer

EraDev

January 2023 – April 2024 | Cairo, Egypt

- Built responsive, reusable UI components across multiple client projects using React.js.
- Focused on performance optimisation, component architecture, and clean design systems.
- Delivered cross-browser compatible interfaces that improved user experience scores.

IT Specialist (Career Transition Period)

Reefy

April 2024 – March 2025 | Cairo, Egypt

- Maintained network infrastructure and system performance while continuing self-development in full-stack technologies.
- Used this period to deepen skills in Laravel and Next.js — transitioning back to a development role in April 2025.

SKILLS

Backend	Frontend	Tools & Concepts
PHP (OOP) · Laravel · Laravel Modules RESTful API · MVC · MySQL Authentication & Authorization Database Design & Migrations	React.js · Redux · Next.js JavaScript (ES6+) · Tailwind CSS Blade Templates · Responsive Design	Git & GitHub · API Integration Payment Gateways · POS Systems E-commerce Logic · ERP Systems Agile Collaboration

PERSONAL & PRACTICE PROJECTS

Eco Store

Tech: React.js

- E-commerce frontend with product listing, cart, and checkout flow.

Rozany Chat

Tech: React.js, WebSockets

- Real-time chat application with live messaging and user rooms.

TemoGPT

Tech: React.js, OpenAI API

- AI chatbot integrating OpenAI API for conversational responses.

Courses API

Tech: Laravel, MySQL

- RESTful backend for a course platform with full CRUD operations.

Restaurant API

Tech: Laravel, MySQL

- CRUD-based backend system for managing restaurant menu and orders.

Weather App

Tech: React.js, REST API

- Live weather lookup app consuming a third-party weather API.

EDUCATION

Bachelor's Degree in Computer Science

Nahda University (NUB) — Faculty of Computer Science

September 2017 – June 2021
